

Brainwavz AP001 Portable Headphone Amplifier Press Release

October 27th 2014 – Brainwavz announces its first audio amplifier, the AP001.

The Brainwavz AP001 is an ultra portable headphone amplifier that is designed to help deliver more power to your headphones, earphones or other portable speakers than your standard iPod, iPhone, Smart phone or MP3 player. Using an OP Amp the AP001 is able to deliver powerful audio amplification and bass enhancement, without much colouring or distortion to the original audio signal.

The AP001 was designed with portability in mind, its light weight 15.5g body houses a 120mAh battery that will also for over 12 hours of continuous use. There are no on and off switches, the smart circuitry knows when an audio signal is present to automatically turn on and turn off when no signal is present. The AP001 also features two line out which can deliver equal power output to two headphones, earphones or speakers at the same time.

Using this portable headphone amplifier will help enhance the performance of almost any headphones or earphones.

Features:

- OP AMP for powerful and clean volume, with bass enhancer
- Stereo line in and dual stereo line out
- No degradation of low or high frequency response
- Supports 16 ohm - 150 ohm earphone & headphones
- Built in 120 mAh rechargeable battery, provides 12 hours of continuous usage
- Automatically defects audio to power on and off.

The Brainwavz AP001 portable headphone amplifier has a \$30.00 SRP and will be available from such fine retailers as Amazon and Amazon UK as well as authorized Brainwavz resellers throughout the world (www.yourbrainwavz.com/buy.html).
