

True Innovation, Engineered In-House: Steinway Lyngdorf Takes Ownership of Nexgentec Audio Brand and Products

Skive, Denmark – September 2nd, 2025 – Steinway Lyngdorf, the Danish audio pioneer renowned for leading breakthroughs in digital amplification and room correction technology, is proud to announce that SL Audio A/S has taken ownership of the Nexgentec Audio brand and product portfolio—globally recognized for its industry-leading Audio-over-IP solutions in the marine and luxury residential sectors. This strategic integration deepens Steinway Lyngdorf’s leadership in audio innovation and expands our capacity to develop and deliver world-class, fully in-house engineered solutions.

As part of this transition, the core team behind Nexgentec—Rico Vögeli, founder and CEO, and Boas Hochstrasser, CTO—have joined a newly established Swiss branch office of SL Audio A/S, where they will continue to develop and support the product line under the Nexgentec name. While the former Nexgentec Audio company has ceased operations, the new branch—SL Audio A/S, Skive, Branch Konolfingen—will serve as the foundation for the brand’s continued evolution. This structure ensures Nexgentec’s advanced Audio-over-IP solutions remain aligned with Steinway Lyngdorf’s exacting standards for innovation, integration, and engineering precision.

“Joining Steinway Lyngdorf is an exciting new chapter, said Rico Vögeli, founder of Nexgentec Audio. “We now have the R&D muscle, in-house engineering expertise and production capabilities to keep developing the systems we’re passionate about—while expanding our reach through one of the most respected names in high-end audio.”

A Renewal of Vision and Continuity

Nexgentec has earned admiration in the high-end marine and residential markets for its compact, energy-efficient hardware, proprietary software, and exceptional user control. These attributes have made Nexgentec a favorite among European integrators and align seamlessly with Steinway Lyngdorf’s commitment to delivering sophisticated, high-performance audio experiences that integrate beautifully into architectural and lifestyle settings.

“Rico and Boas have developed a truly unique platform for Audio-over-IP distribution,” said Thomas Birkelund, CEO and CTO of Steinway Lyngdorf. “As a company known for our engineering-led culture, we immediately saw the potential to support and scale their vision. By bringing the brand and its engineering team under the SL Audio umbrella, we’re ensuring a future where reliability, innovation, and integration go hand-in-hand—whether on land or at sea.”

Expanding into the Marine and Hospitality Sectors

With Nexgentec’s proven expertise in the marine sector—having equipped many of the world’s leading superyachts—Steinway Lyngdorf will deepen its focus on high-end marine audio. In the future, Steinway Lyngdorf will leverage our extensive network of U.S.-based custom integrators, to introduce Nexgentec’s Audio-over-IP solutions to the North American market. Sales channels will remain separate between the two companies but the shared knowledge base opens new opportunities across luxury residences, commercial environments, hospitality properties, and private resort developments for Nexgentec.

Engineering Excellence—All Under One Roof

Since its inception, Steinway Lyngdorf has upheld a steadfast commitment to in-house research, product development, and manufacturing. With Nexgentec's integration, we bring their proven AoIP technology into our engineering ecosystem—further reinforcing our reputation as an uncompromising innovator and preferred OEM partner for discerning brands worldwide.

Looking Ahead: Innovation, Expansion, Partnership

As Steinway Lyngdorf and Nexgentec enter the next chapter, we intend to:

- Leverage decades of combined experience to fuel the development of new, high-performance products.
- Help introduce Nexgentec's proven AoIP technology to expanded their own dealer and distributor networks across international luxury residential, marine and commercial markets.
- Sustain the uncompromising quality of support and service that integrators and clients expect.

About Steinway Lyngdorf

SL Audio A/S, dba Steinway Lyngdorf, was founded in Denmark by audio innovator Peter Lyngdorf in 2005 to design, develop, and manufacture sound systems and components under two business units: Steinway Lyngdorf – producing products labeled Steinway & Sons, and Lyngdorf Audio – producing products labeled Lyngdorf.

Steinway Lyngdorf the only manufacturer of audio products to win the exclusive endorsement of the legendary piano manufacturer Steinway & Sons, provides fully integrated digital audio systems that combine design artistry, exquisite craftsmanship, and perfected technology. For more information, visit www.steinwaylyngdorf.com.

Lyngdorf Audio develops, designs, and creates products for high-performance audio enthusiasts seeking the highest quality, most exciting components on the market. Lyngdorf Audio products do not re-produce music, they re-play music with all original passion and musicality intact. The brand is known throughout the world as the leader in high-performance digital audio and for its RoomPerfect™ room calibration. For more information, visit www.steinwaylyngdorf.com
