# NEW RANGE OF Hi-Fi CABLES

PRESS RELEASE

---

## NEW BLACK & RED SERIES RANGE

To enhance every listening experience

For nearly 45 years, TRIANGLE has been applying its expertise to high fidelity, with recognized expertise in the design and manufacture of Hi-Fi speakers.

To complement each project, TRIANGLE unveils a new series of cables designed to adapt to all setups and get the most out of them, guaranteeing high-quality signal transmission.

The RED and BLACK cable ranges are not limited to pre-mounted speaker cables with banana connectors. TRIANGLE is now expanding its offering with RCA

modulation cables that allow you to connect both a CD player and a turntable to your amplifier or powered speakers.

Discover the new RCA Y cable to connect your subwoofer to your active speakers or Hi-Fi amplifier. With the BLACK & RED Series ranges, TRIANGLE offers a complete analog solution using high-quality components for these beautifully designed cables that meet the expectations of the most demanding users.

# PRE-MOUNTED SPEAKER CABLES

For a perfect connection  
between speakers and amplifier

TRIANGLE pre-assembled speaker cables use multi-strand OFC oxygen-free copper for optimal conductivity. Equipped with banana plugs, the connection is secured by a reliable contact. These cables guarantee smooth signal transmission. Easy to install, BLACK & RED cables are the ideal solution for optimizing your system

2 x 2,5 m : 139€

2 x 3 m : 199€

2 x 5 m : 249€

# TWO RANGE LEVELS

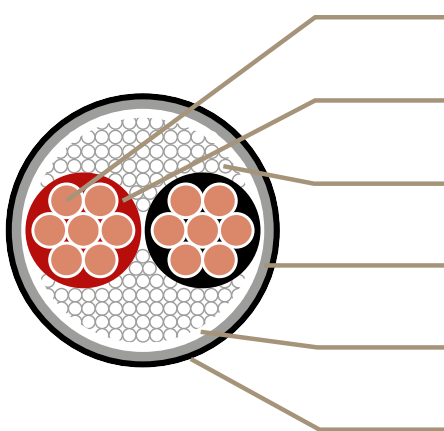

## The same high standards

**BLACK cables** combine rigor and simplicity, delivering remarkable performance and precision. They will satisfy audiophiles looking for a technically sophisticated solution designed with rationality in mind.

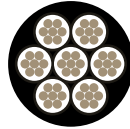

**RED cables** express controlled power. Designed for audiophiles with ambitious systems, these cables incorporate the technical expertise of the BLACK range with a larger conductor cross-section. High-quality components for exceptional accuracy and reproduction, without restraint and in complete freedom..

# AUDIOPHILE CONSTRUCTION

Designed with high standards in mind

**MULTI-STRAND**

**OXYGEN FREE COPPER**

## UNCOMPROMISING PERFORMANCE

At the heart of each cable, TRIANGLE uses high-purity oxygen-free copper (OFC) stranded wire, renowned for its excellent conductivity. Composed of a 7-strand multi-wire structure, signal transmission is smooth. The result is faithful and natural reproduction without the slightest alteration, on a par with the most high-performance systems.

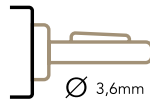

**TRIPLE INSULATION**

## PRESERVED SIGNAL

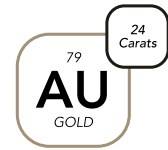

BLACK & RED Series cables feature reinforced insulation, which is often overlooked. Effective insulation not only physically protects the conductor but also reduces electromagnetic interference and minimizes signal loss.

This architecture, combining several layers of cotton and polymers, ensures reliable, crystal-clear transmission regardless of surrounding electrical sources.

BANANA PLUGS

GOLD-PLATED TERMINALS

### OPTIMAL CONNECTION

BLACK & RED Series cables feature 24-karat gold-plated banana connectors. This choice ensures excellent conductivity and limits oxidation over time.

The banana plug ensures efficient and secure signal transmission. Installation is easy on the screw terminals of your speakers and amplifier.

## RCA CABLES

For a stable connection to analog sources

RCA modulation cables connect your sources, such as a CD player or DAC, to your amplifier. They ensure smooth and faithful signal transmission, without loss or alteration, so you can enjoy every listen to the fullest.

For turntables, the cables also come with a dedicated ground wire, ensuring an optimal connection to your amplifier without any noise interference.

2 x 1 m : 39€

2 x 3 m : 55€

## RCA Y CABLE SUBWOOFER

For optimal connection

Specifically designed for connecting subwoofers, the RCA Y cable ensures consistent signal distribution from your Hi-Fi amplifier or active speakers to the stereo inputs of the subwoofer.

This enhances the impact and precision of low frequencies, while maintaining the balance and consistency of your high-fidelity system.

3 m : 49€

5 m : 59€

# BANANA PLUGS

## Simplicity and efficiency

BP450 plugs secure connections between your amplifier and speakers. They guarantee optimal contact between your cable and screw terminals, while making installation easy.

The connectors are compatible with your existing cables, supporting a maximum cross-section of 4mm<sup>2</sup>, and are made from high-quality materials. The 24K gold plating ensures optimal signal conduction while protecting them from corrosion. Insulation is provided by an anodized aluminum capsule.

Perfectly suited to cables in the Opéra range, the BP450s are also compatible with most cables on the market.
