LUNAR 3 : The new turntable

The premium turntable

For active speakers and Hi-Fi systems

Following the success of its first turntable, the LUNAR 1, TRIANGLE is launching the LUNAR 3 this autumn.

The new LUNAR 3 is inspired by Pro-Ject's flagship Debut Carbon model, with its iconic carbon arm. It combines meticulous finishes and top-quality components thanks to the expertise of the Austrian manufacturer.

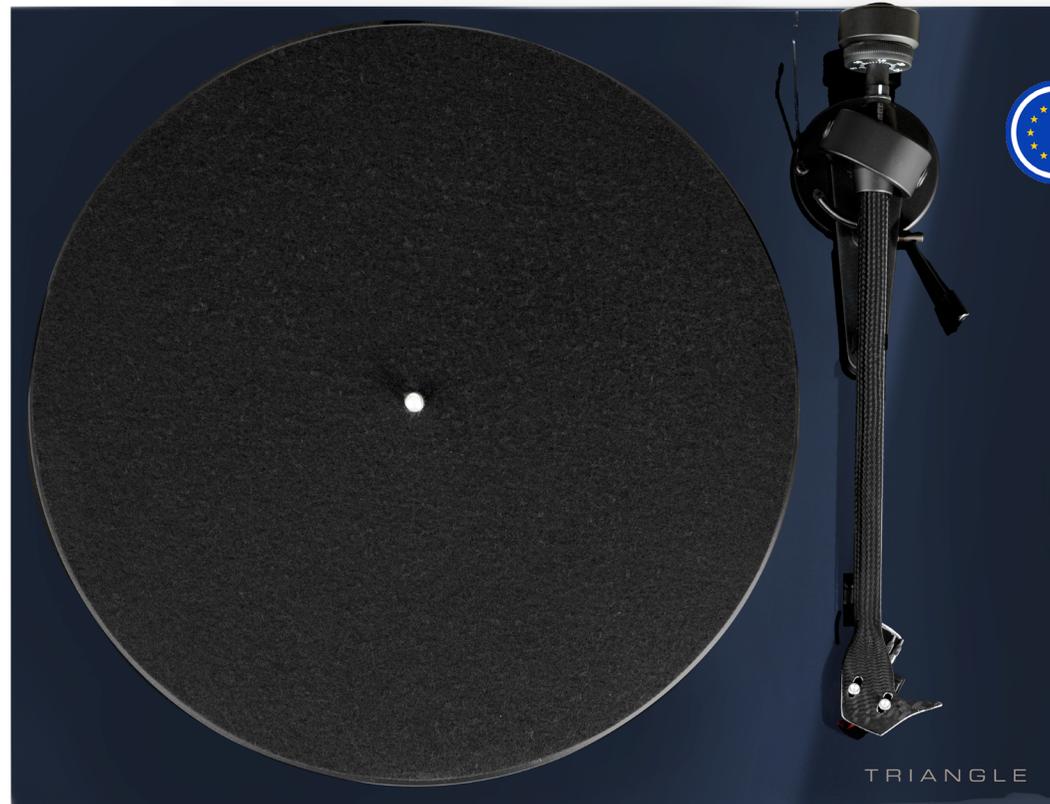

Designed for universal use, the LUNAR 3 incorporates a phono pre-amplifier for perfect compatibility with CAPELLA active loudspeakers.

The turntable comes in a luxurious lacquered finish, making it an elegant partner for CAPELLA.

Available in Black, Blue and White high gloss finishes.

LUNAR 3, made in Europe

By our Pro-Ject partner

Pro-Ject
AUDIO SYSTEMS

Benefitting greatly from the expertise of the Austrian company Pro-Ject, Europe's leading turntable manufacturer, the LUNAR 3 features an engine with two sorbothane silentblocks and a next-generation suspension system that limits vibrations.

The rotation speed is perfectly controlled, smoothly reproducing the movement right up to the stainless-steel axis.

This is where you find the flat belt that drives the steel platter, whose density ensures even rotation.

All these components are placed on a high-density fiberboards base, mounted on three damping feet, guaranteeing excellent stability.

ORTOFON 2M RED CARTRIDGE

The LUNAR 3 features an MM (moving magnet) cartridge, well known to audiophiles: the Ortofon 2M Red. Research carried out by Danish manufacturer Ortofon, who have been specializing in vinyl reproduction for over 100 years, have produced a high-precision cartridge with exceptional musicality.

Its diamond elliptical shaped stylus matches the groove perfectly and enables the LUNAR 3 to deliver outstanding musical performance, so you can get the best possible performance from your vinyl records.

CARBON TONEARM

The LUNAR 3 features a straight tonearm made from a single piece of carbon, for which Pro-Ject is known. With an effective weight of just 6g, it has the advantage of being both exceptionally light and rigid to reduce unwanted vibrations.

Meticulously engineered, this turntable allows accurate adjustment of the counterweight, which is placed on the back of the tonearm, to optimize the tracking force placed by the cartridge on the record.

The LUNAR 3 also features an antiskating calibration weight to compensate for the centripetal force that pulls the tonearm towards the inside of the record.

UNIVERSAL COMPATIBILITY

The LUNAR 3 turntable is compatible with all types of vinyl records on the market, being 33, 45 or 78 rpm. Selecting the rotation speed for 33 and 45 rpm vinyl records is easy, thanks to the switch located under the left front panel of the turntable.

Playback of 78 rpm records is ensured by a special belt, supplied with the LUNAR 3.

BUILT-IN MM PHONO PREAMP

The LUNAR 3 was designed to be compatible with all audio systems, from traditional Hi-Fi systems to the latest generation of connected speakers.

It directly integrates an MM phono preamp that can be activated if your Hi-Fi system is not equipped with one.

To ensure perfect connectivity with your Hi-Fi system, high-quality gold plating is used on the turntable's outputs, as well as on the RCA Phono cable supplied with the turntable.

DESIGNED FOR CAPELLA

The LUNAR 3 is designed to be the perfect turntable to complement the active TRIANGLE CAPELLA speakers.

Thanks to its built-in phono preamp, the turntable can be connected directly to the speakers, without the need for additional equipment.

The turntable finishes have been chosen to match those of the CAPELLA speakers perfectly, to create a harmonious and elegant Hi-Fi system.

PREMIUM FINISHES

The LUNAR 3 features a luxurious lacquered finish to beautifully match our CAPELLA speakers.

The turntable is available in three finishes: Black, White, and Blue. It comes with a lightly smoked acrylic dust cover with adjustable hinges, to protect the turntable from dust.

MILLIMETRIC PRECISION

Electronic stylus balance

To optimize your stylus settings, we recommend using a stylus balance like the Pro-Ject Measure It E.

It allows you to adjust the amount of pressure on your diamond tip to avoid excessive wear of your diamond and vinyl records.

PRO-JECT cell scale available as an option at a price of €29 incl. VAT

CONTENTS & ACCESSORIES

The LUNAR 3 is supplied with:

- 1 x mounted Ortofon 2M RED cartridge
- 1 x steel platter
- 1 x felt mat
- 1 x dust cover
- 1 x AC outlet
- 1 x RCA cable
- 1 x flat belt for 33/45 rpm records
- 1 x round belt for 78 rpm records
- 1 x paper ruler for cartridge alignment
- 1 x counterweight
- 1 x anti-skating weight
- 1 x adapter for 45 rpm records
- 1 x 1.5mm Allen key to adjust the azimuth
