HOME THEATER ADDITION TO THE BOREA RANGE

TRIANGLE expands its range of home theater products and introduces its latest innovation: the surround effect channels BRA1.

THE BOREA RANGE READY FOR HOME THEATER

Following the global success of the Borea range, the French brand TRIANGLE expands its range of home theater products.

The BRA1 speakers now completes the collection with the latest surround sound technology.

To ensure a consistent sound, they use the same technologies as the current Borea range: an EFS fabric dome tweeter combined with a natural cellulose paper membrane driver.

Triangle stands out thanks to the presence of this 16 cm driver offering the great open sound, the brand is known for.

VERSATILE USE

Discreet and versatile, the BRA1 speakers can be positioned directly on one of the models of the range* or fixed on the back or side walls of your listening room.

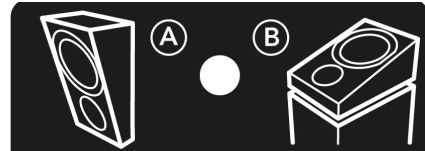

- **Used as vertical 3D effects:**
The speakers are placed on top of the main speakers, with the BRA1 angled up, using the sound wave reflection principle, thus adding a new vertical dimension.
- **Used as horizontal effects:**
The speakers are placed on the back or side walls thanks to their dedicated mounting system. With an angled front, the BRA1s allow for precise and direct targeting of the sound waves towards the listener.

** The BRA1 can be placed on the BR03, BR07, BR08 and BR09 speakers of the Borea range.*

ADAPTIVE CROSSOVER

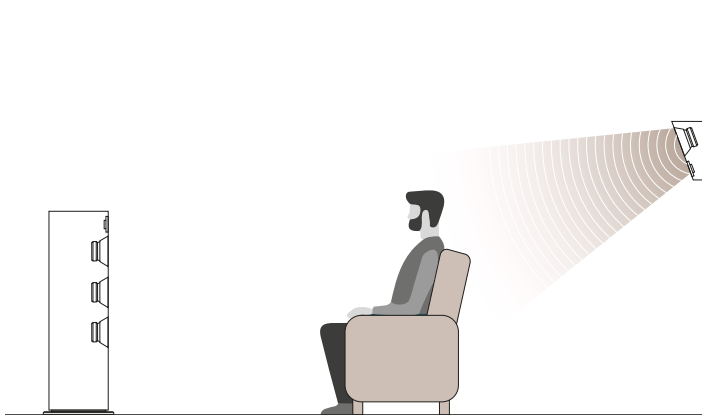

The versatility of the BRA1 speakers is supported by a crossover adjusted according to their use.

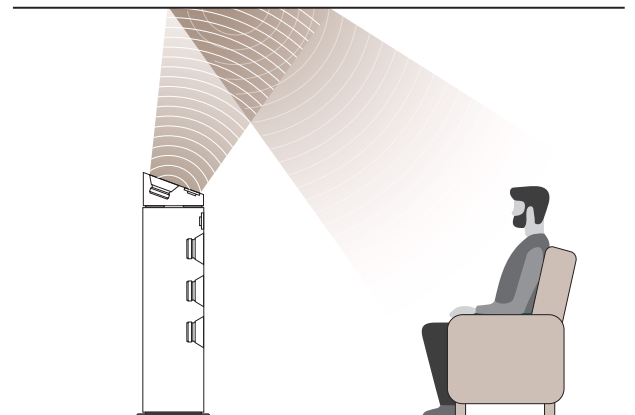

Two-way crossover at the rear of the BRA1

Placed on top of the main speakers, the BRA1 have a different behavior than a traditional direct dispersion speaker. It is therefore necessary to compensate for the directivity in order to maintain the entire bandwidth that is altered by the sound wave reflection.

Two types of crossovers are available, a linear one for direct dispersion of horizontal effects, and an upward crossover to compensate for the losses associated with indirect dispersion of vertical 3D effects.

Direct dispersion

Sound wave reflection

BOREA & TALES: COMPLEMENTARY RANGES

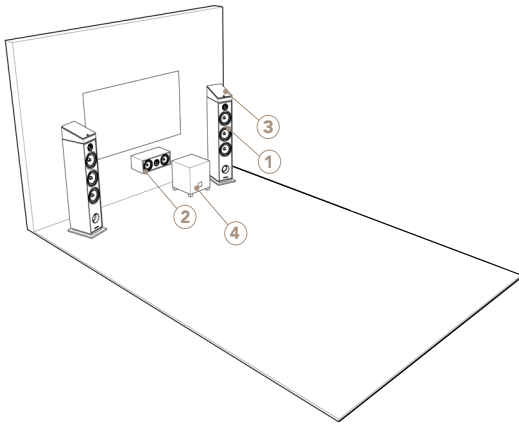

The association of BOREA & TALES ranges offers home theater set-ups great sound and value.

Combine the speakers of the Borea range (BR09, BR08, BR07, BR03, BR02, BRC1 & BRA1) and the Tales 340 subwoofer to build a performing home theater set-up with the latest surround sound technology, offering a clear, dynamic, and precise sound for an immersive and heart-pounding experience.

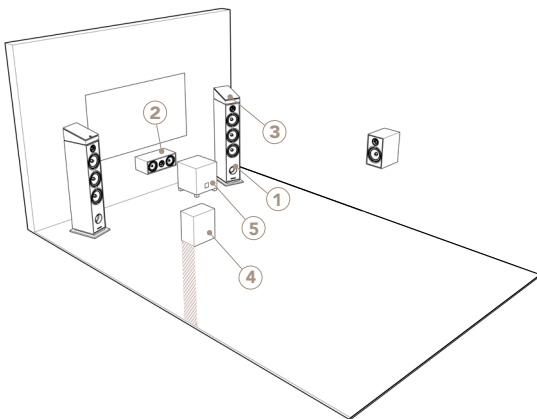

THE DIFFERENT SET-UPS

Adding the BRA1 speakers to your A/V system allows a configuration ranging from 3.1.2 to 9.1.4.

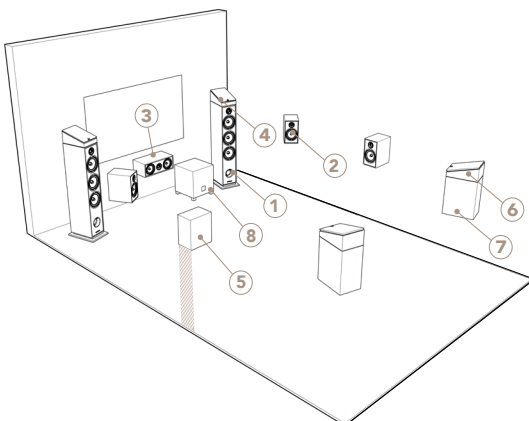

- **Minimalist & compact 3.1.2 set-up**
Enjoy a discrete home theater set-up in a lounge or living room.

1- Front speakers: BR09/ BR08 / BR07 / BR03
2- Center-channel speaker: BRC1
3- Front presence speakers: BRA1
4- Subwoofer: Talès 340

- **Classic 5.1.2 set-up**
The most common configuration to benefit from all the surround technologies.

1- Front speakers: BR09/ BR08 / BR07 / BR03
2- Center-channel speaker: BRC1
3- Front presence speakers: BRA1
4- Side effects speakers: BRA1 / BR03 / BR02
5- Subwoofer : Talès 340

- **Ultimate 9.2.4 set-up**
If you are looking for extreme sensations, in line with the best movie theaters, create a complete and advanced system in your listening room.

1- Front speakers: BR09/ BR08 / BR07
2- Front speakers: BR02 / BR03
3- Center-channel speaker: BRC1
4- Front presence speakers: BRA1
5- Side effects speakers: BRA1 / BR02 / BR03
6- Rear presence speakers: BRA1
7- Rear effects speakers: BR03
8- Subwoofer: Talès 340

THE BOREA TECHNOLOGIES

The BRA1 speakers, like the Borea range, are inspired by preceding research and innovations of the Esprit Ez series. TRIANGLE's goal is to open the Hi-Fi and Home Theater market to a wider audience, thus allowing access to quality systems with less elitist budgets.

Each element is designed and optimized for a perfect sound reproduction, true to high fidelity, without any compromise:

- Cabinets in MDF with a harmonious design, featuring cleverly placed internal reinforcements that limit vibrations.
- Speakers with the same kit and engines as the Esprit EZ range.
- 25mm fabric dome tweeter with EFS system for controlled directivity.
- Quality crossover.
- Magnetic grill system.
- Speaker decoupling according to the nature of your flooring.
- Wide choice of finishes.

AN AWARD-WINNING AND SUCCESSFUL RANGE

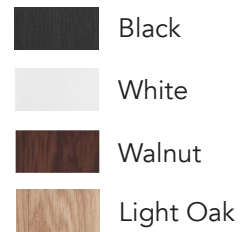

The entire Borea range has received the prestigious EISA Award 2020-2021 "Home theater speakers with the best sound and value".

PRACTICAL INFORMATION

The BOREA BRA1 speakers are available now, in 4 finishes with a retail price of 399€ per pair.
