

Audio Ethernet Cable NA4 Released

AIM Electronics Co., Ltd. (Head Office: Sagamihara, Japan / CEO: Eishi Nakayama) is proud to announce the release of its newest model of the 「SHIELDIO」series, developed based on decades of expertise in digital signal transmission technology. The product will be officially launched on July 15, 2025.

This product is a premium-grade LAN cable developed specifically for network audio applications. Following the grand design of the N-ZERO concept—which has long aimed to achieve superior noise shielding in acoustic environments—we have successfully reduced audio signal transmission loss by using newly developed high-purity oxygen-free copper conductors. Furthermore, the cable features an original triple-shielding structure that combines a high-performance dual-layer aluminum shield with a high-density copper braided shield, thoroughly eliminating external noise interference. In addition, by adopting a highly noise-resistant die-cast modular connector, we have minimized sound quality degradation at the connection points, enabling stable and high-quality audio transmission.

Experience a new dimension of acoustic space with AIM's audio LAN cable, the「SHIELDIO」NA4.

Product design or specification may change without prior notice.

●Release Date : 2025.7.15

●Model Number and Product Name

Model	Product Name	
NA4-005	Audio ethernet Cable [SHIELDIO] NA4	0.5m
NA4-010	Audio ethernet Cable [SHIELDIO] NA4	1m
NA4-015	Audio ethernet Cable [SHIELDIO] NA4	1.5m
NA4-020	Audio ethernet Cable [SHIELDIO] NA4	2m
NA4-030	Audio ethernet Cable [SHIELDIO] NA4	3m
NA4-050	Audio ethernet Cable [SHIELDIO] NA4	5m
NA4-075	Audio ethernet Cable [SHIELDIO] NA4	7.5m
NA4-100	Audio ethernet Cable [SHIELDIO] NA4	10m
