

TRIANGLE

MANUFACTURE ELECTROACOUSTIQUE

BOREA RANGE

NOW AVAILABLE IN A NEW FINISH

PRESS RELEASE

THE BOREA RANGE FEATURES A NEW SCANDINAVIAN INSPIRED **LIGHT OAK FINISH**

TRIANGLE, the French loudspeaker manufacturer, carries on its search in acoustics and design by regularly introducing new finishes for its ranges and flagship models.

In the spotlight this fall is the **2020 best-seller**, the BOREA range, now enhanced with a **new natural Light Oak finish**, chosen with care and boldness.

This new sleek and clean color follows the trend of Scandinavian design. A return to natural shades, bringing the speakers elegance and authenticity, and adding a touch of femininity.

Discrete, bright, and soft, the new BOREA Light Oak speakers integrate with delicacy into any interior to give life to the music.

MATERIALS AND COLORS IN PERFECT HARMONY

The Light Oak finish of the Borea range differs by the subtle alliance of colors and materials to provide a delight for the eyes and the ears. The wood associated with white & cream colors is perfectly in line with the Nordic-style decoration: discreet and timeless.

The drivers' rims, the ports and the feet have also been redesigned for a "tone-on-tone" effect that blends harmoniously all the technical aspects within these sleek and modern speakers.

The result is a soft note so the only thing that stands out is the high-fidelity Triangle sound, as powerful and clear as ever.

ATTENTION TO DETAIL

All speakers in the Borea range have a magnetic protective grill, showing no visible inserts or screws. In the new Light Oak finish, the grilles are coated with textured Heather Gray fabric providing an unobtrusive and chic design. Adding a touch of warmth and relief, they enable the speakers to elegantly blend into any interior.

The combination of white, wood and gray offers a minimalist, natural and modern finish.

ACOUSTIC PERFORMANCE

EFS tweeter, midrange in natural cellulose, powerful and precise low frequencies, and Driver Vibration Absorption System (DVAS) remain the core technologies used in the range to provide high quality yet affordable acoustic performance.

Specially designed and developed by TRIANGLE, these cutting-edge technologies reinforce the sound neutrality and clarity.

BOREA, A WORLD-RENOWNED RANGE

Since their launch, the BOREA speakers have received unanimous praise from the international press. The range is acclaimed for its excellent acoustic performance, its tone accuracy, and the excellent value for money it offers.

This new Light Oak finish is now available across all models of the Borea range at TRIANGLE authorized resellers in France.

EISA AWARD 2020-2021

The entire Borea range was recognized by EISA expert as "Best buy home theatre speaker system".
